

How to succeed with the passive self-ligating system!

Dr. Matias Anghileri, Buenos Aires, Argentina

GENERAL INFORMATION

Diagnosis, treatment mechanics and clinical tips to succeed with the Damon System

Dr. Anghileri will be going through the phases of Damon treatment explaining how to take advantage of each and every clinical situation to make our practice more efficient:

DAMON THEORY

PART 1

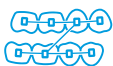

- › Bite turbos, timing with the archwires, rotated teeth: "The ANG (Anghileri) Technique", indirect ligature, how to bond the second molar tubes, light elastics.
- › Torque prescription: The "Golden Rules". Understanding the right choices.
- › D-Gainer: When, how and why?
- › Impacted Cuspids: New techniques and approaches - When and how to take a high cuspid directly.
- › Knocking down 10 myths of the Damon System

TREATMENT PLANNING

PART 2

- › Archwire sequencing, overlay arch, when and how to use the accessories archwires in Damon, what to do when teeth protrude, why diastemas appear and how to avoid them.
- › 12 steps to follow in border cases with overcrowding in the anterior. Difficult narrow arches (and 8 different ways to correct them).
- › Open bites: New ways to diagnose them and to manage them

AUXILIARY MECHANICS

PART 3

- › Final Archwire Individualization, 5 factors that influence over the arch perimeter, maximum and minimum anchorage when we are closing spaces.
- › Midline correction and the use of elastics. Mechanics to verticalize a molar tilted to mesial or lingual with or without TADs.
- › Class II & III cases: Elastics, functional appliances and correction with or without TADs.

PART 4

- › Finishing and contention
